TITLE INDEX

Blast wave, variable energy, through rotating gas (Chaturani and Kumar), 82.

Blood flow, oscillatory, in arteries, a theoretical model of (Keshavarzi and Kline), 236.

Boron in the ultrabasics of Nuggihalli Schist Belt, Karnatak State, India, geochemistry of (Damodaran and Somasekar), 310.

C–14 in nature, box model calculations for studying the variation of (Venkatavaradan, 256.

Dieckmann cyclization and utilization of the products in the synthesis of steroids, studies (Banerjee), 282.

Digital pictures, formal description, compression and transformation of (Krishnamurthy and others), I, II, 139, 195.

Ellipse, extension of focal points (by more than two), of, evolution of 'N' polar curves by (Sahadevan), 269.

Flow of a fluid with microstructure past an accelerated plate, III (Vidyanidhi and Sithapathi), 18.

Flow of fluids with microstructure between parallel plates, unsteady (Vidyanidhi and Sithapathi), 1.

Flow, plane Couette, with a rectangular cavity, a numerical procedure for (Bhatnagar and Wong), 173.

GF structure manifold (Mishra and Pandey), 49.

Heterocyclic rings containing nitrogen, studies in the formation of (Veeranagaiah and others), 230.

Integral relations and their applications, certain (Koul), 56.

Kinetics of oxidation of deoxybenzoin by chromic acid (Nayak and Khandual), 33.

Matrix differential operator, second-order (Shaw and Bhagat), 213.

Mercuric sulphide, specific surface area of (Venugopal Chetty and Naidu), 26.

Physiologically, active compounds, search for, XXIII (Sreenivasalu and others), 41; XXIV (Raju and Rao), 223.

Polarography, study of mixed complexes—copper-glycine-α-alanine and cadmium-ammonia-pyridine complexes (Sundaresan and Sundaram), 161.

Power spectrum and digital filtering methods (Dhanju), 67.

Riemannian manifold, curvature tensors in (Pokhariyal), 105.

Temperature distribution in a parallelopiped under the influence of heat source with boundary conditions of second kind (Rai and Pandey), 111.
